

Dear Sir:I reli on XM radio to provide me the traffic and weather information. XM is the future of radio and it should be allowed to continue as is and be expanded. It provides a service to the public that is unsurpassed. You allow satellite TV to thrive so why would you want to stifle the satellite radio from becoming the next great innovation to serve the public. Expand satellite radio to its maximum and tell the National Association of Broadcasters that satellite radio is here to stay and not to dictate what I am permitted to hear. Please reject the NAB's petition 04-160 and support XM's ability to provide the kind of programming that I and my family demand and deserve.
